

Select File > New > Project From Existing Code...

Select Visual C#

Specify the Project Details

- 1) For "Where are the files?", select the folder that contains the .cs file that you want to open
- 2) Uncheck "Include subfolders"
- 3) For "Name", key in the name that you want to use for the project.
- 4) Click "Finish". VSC will then build the project for you using the .cs file.

To view the code, double click on “Program.cs” in the Solution Explorer on the right.

To run the program, click on the “Start” button (green triangle)
